Laxtracide TCCA

TECHNICAL INFORMATION

Description

Laxtracide TCCA is an excellent source of available chlorine for the control of biofouling in cooling water system. Laxtracide TCCA is a tablet form, easy handling and most suitable use for continuous chlorination. Because its slow dissolving characteristic, Laxtracide TCCA can be placed in a simple feeder, and which can adjust the dissolution rate further.

Composition

TRICHLOROISOCYANURIC ACID

Typical Properties

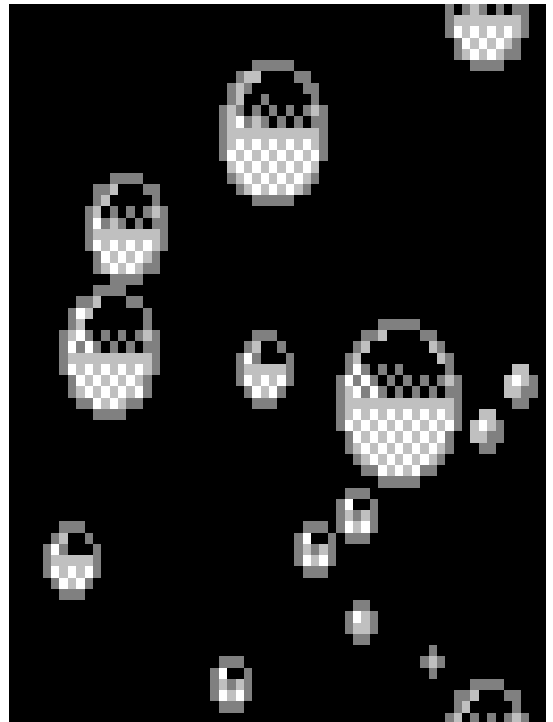

Appearance	Off-white table solid
Molecular weight	232
Available chlorine	≥90%
PH (1% soluble)	2.7 - 3.3

Application

Cooling water systems
Air conditioner system
Swimming pool
Food processing industries

Availability

Laxtracide TCCA is readily available in 25 or 50Kgs net in PE drum with 2 polyethylene bags inside
